

**The Creator's plan  
is for every  
human being to  
be drinking  
clean water.**

At **Water With Blessings**, we are passionate about bringing clean water to the Creator's children. We want to help you take charge of your drinking water for the sake of your health.

The **Water With Blessings Navajo Nation Project** is for the Navajo people, and it will go through the hands and hearts of the Navajo people.

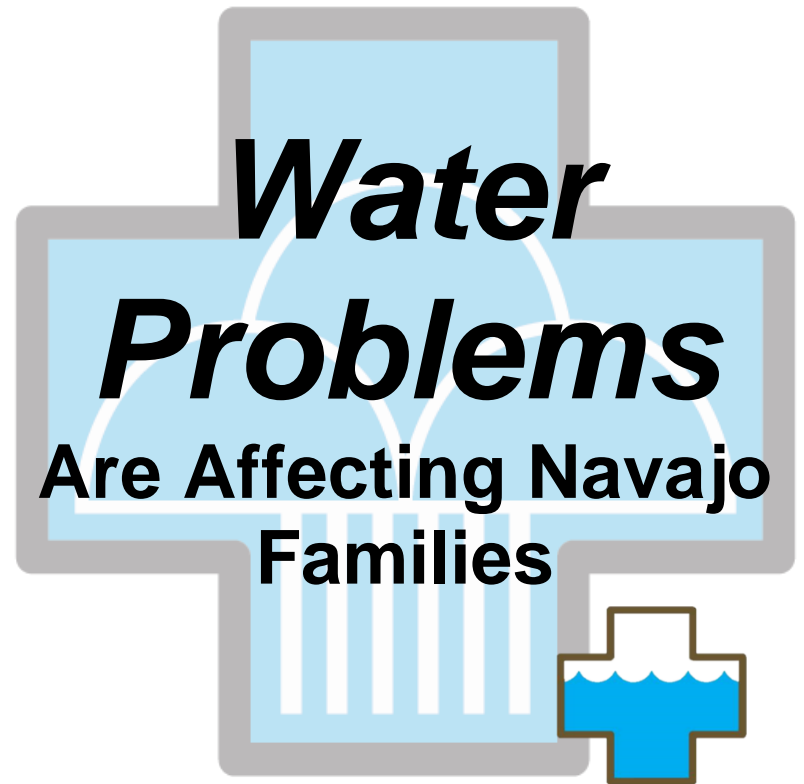

Let our Creator continue to lead and guide us as we work together for clean water for the Navajo people.

**Roger Willie, Navajo**  
WWB Partner

**Sister Lorraine Lauter**  
WWB Executive Director

*A Message from* **Water With Blessings**

**Where do you get  
your drinking water?**

- ✓ You haul your own drinking water
- ✓ Your drinking water is delivered to you
- ✓ Your drinking water comes from a tap in your home
- ✓ You buy water bottles from the store

# The Problem

Is your  
drinking water clean?

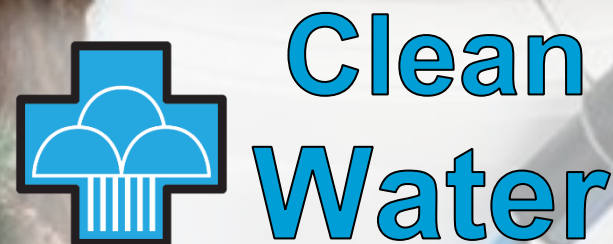

Your water could be contaminated by

1. Biological (germs) -- bird droppings, animal and human feces, algae, parasites, etc.
2. Non-Biological (chemicals) -- uranium, other heavy metals

Your health could be affected by your drinking water.

1. Intestinal problems: diarrhea, cramps, vomiting
2. Dehydration: not enough clean water for health (affects blood pressure, diabetes, etc.)
3. Weakened immune system: more likely to contract other disease
4. Intestinal parasites: discomfort, affect nutritional benefits

The Solution for

Water With Blessings (WWB)

WWB is an experienced clean water program that provides families with the best possible water filtration solution and training for their homes:

**The Sawyer PointONE  
Household water filter**

1. Removes 99.999999% of all biological contaminants from your drinking water.
2. Manually operated: quickly produces a gallon of water in about 5 minutes.
3. Filter the water you haul.
4. Take control of your clean drinking water.
